

Plain White T's, Love Keeps Growing

She said, "My love could stack
Up to the stars and back"
I said, "I love you more"
I gave her my best kiss
Lingered on her lips
And felt her breathe in slow

Then I told her
You can rest your head upon my shoulder
Don't look back, we're going forward
And even if we have to take it slow

Our love keeps growing
Our love keeps growing

Life has ups and downs
But you're the solid ground
Underneath our boots
So come the wind and rain
It only makes us take
Even deeper roots

Have I told ya
Beauty is in the eye of the beholder?
If you were any hotter, you'd be solar
And even if we have to take it slow

Our love keeps growing
Our love keeps growing

Like a pine reaching into the sky
And digging roots down into the earth
My second chance is here in your branches
Honey, I know what you're worth

Then I told her
You can rest your head upon my shoulder
Don't look back, we're going forward
And even if we have to take it slow, we'll grow

Our love keeps growing
Our love keeps growing
Our love keeps growing
Our love keeps growing
Our love keeps growing
Our love keeps growing
Our love keeps growing
