Coldcut, Return To Margin

People hold on -
Everybody's looking for a meaning
everybody's doing their own thing
And nobody's solving the problem
ain't nobody helping each other.
Some people give in to fear
some people give into hunger
Some of us live for the future
some of us wonder.
Give a little light
give a little love
Baby
there's enough for everyone.
Give a little hope and a little trust
Maybe there's enough for everyone.
People hold on
don't do yourselves wrong
People hold on
we've got to be strong
people hold on.
Everybody's getting frustrated
Why should we live with this hatred?
We are all dancing on a thin line
They're making out we're having a good time.
So who's gonna give us the answer
sister and brother?
Give a little light
give a little love
Maybe there's enough for everyone.
People hold on
don't do yourselves wrong
...
Give a little light
give a little love
...
People hold on
don't do yourselves wrong
...
It won't be long
people hold on
we've got to be strong.
