Little Dragon, Sunshine

You were my sunbeam when skies are dark
You got me flying way beyond
?Cause I?ve been wandering and feeling lost
Now, like whirlwind, you put a spell on me

Have been dragging my feet along sleepless everday
I couldn?t figure out a thing
Until your lightbeam came crashing in
Waited five seconds, soaked in some magic, shoot across
To transform my every loss, but then you can storming

You were my sunbeam when skies are dark
You got me flying way beyond
?Cause I?ve been wandering and feeling lost
Now, like whirlwind, you put a spell on me

Your electric ways had me right then
Me and my ghost of the past, get him tied down
Waited five seconds, soaked in some magic, come across
To transform my every loss, but then you can storming in

You were my sunbeam when skies are dark
You got me flying way beyond
?Cause I?ve been wandering and feeling lost
Now, like whirlwind, you put a spell on me
