James, All Good Boys

Its a boy, man-child,
a question of genes
body hair, deep voice
a handful of dreams
We don't get any older
we're still stuck in school
Never felt much love
until you came through
until you came through
All Good Boys
They follow their father in you
All good boys
They fought for you
They failed for you
All good boys
We can live with one another
brother kills his long lost brother
We can live with one another
brother kills his long lost brother
Little boys in charge
Don't know what to do
What a waste
so close
but sharing's taboo
We don't get any older
we're still stuck in school
We dont get any wiser
I'm still the same old mule
the same old mule
All Good Boys
They follow their father in you
All good boys
They fought for you
They failed for you
All good boys
The River, the river, the river runs through
from father to son
to tender the roots
The River, the river, the river runs through
from father to son
to tender the roots
All good boys
They fought for you
They failed for you
The River, the river, the river runs through
from father to son
to tender the roots
All good boys
They fought for you
They failed for you
The River, the river, the river runs through
from father to son
to tender the roots
All good boys
They fought for you
They failed for you
The River, the river, the river runs through
from father to son from father to son from father
