Volbeat, Something Else Or

Never felt the hunger
For one love that share one mind
But with you it's something else
That keeps my spirit high
Don't we all now have
This deadwish crawling in our mind
Well I know I got mind
Together baby we will die

As I see you
With the time is that I need you
I keep my smile up, for all time
I do because you mind

Well it ain't pink you know
Dark clouds always coming by
USe the negative moments to
Get stronger next time in line
But with you it's something else
That keeps me loving you
Should you leave before me
Over your ash I'll weep and then I'll die

As I see you
With the time is that I need you
I keep my smile up, for all time
I do because you mind

Then again until it's so
The dice keep tumbling round and round
Witht he name of those
Who could stick together for all time
Have you notice that the dice magnetic
Call our names
Well I told you again and again
With you it's something else

As I see you with the time
Is that I need you
I keep my smile up with the lie
That I need you
