# 'N Sync, Baby you are not the only one

I see the things he does to you
All the pain he puts you through
I see whats really going on
Stayin out at night while your on the phone
Take it from me its a lesson to be learn even the good guys get burned
Take it from me I will give you love the kind of love you'd only dreamed of
Chorus:
Baby your not the only one
You dont have to be afraid to fall in love
I know that you heard in the past but if you want it here's my heart
No strings attached
He doesn't give you the kind of attention that a girl like you needs (that a girl like you needs)
He always looks around his eyes wonder around
He doesnt see you like I see yeah
Take it from me its a lesson to be learn even the good guys get burned
Take it from me baby I will give you love the kind of love you'd only dreamed of
Chorus
Take it from me its a lesson to be learn even the good guys get burned
Take it from me I will give you love the kind of love you have dreamed of
So if you wanna take a chance with me
If you take a chance I'll be everything you need becuase its our destiny
Chorus (2x)
