After The Fall, Sunshine Showers

The hour hand has reached
Its final destination
Alarm bells ring
As the pendulum swings
And with the eye to the main chance
Rise up into the morning
And make way the cause
For the iron horse
The temperamental feelings of, resentfullness
Clouds are forming start the morning
The black computer towers
Control the aching hours
Off sunshine showers
Off sunshine showers
The black computer towers
Control the aching hours
Off sunshine showers
Off sunshine showers
You swipe the card and turn the key
You take a seat uncomfortably
Boxed up inside
You've got no where to hide
Boot up the towers black
Plug in dont look back
Eyes under strain
In desperate need of rain
The temperamental feelings of, resentfullness
Clouds are forming start the morning
The black computer towers
Control the aching hours
Off sunshine showers
Off sunshine showers
The black computer towers
Control the aching hours
Off sunshine showers
Off sunshine showers
Can you replace
What time and space has taken from me
Can you replace
What time and space has taken from me
The temperamental feelings of, resentfullness
Clouds are forming start the morning
The black computer towers
Control the aching hours
Off sunshine showers
Off sunshine showers
The black computer towers
Control the aching hours
Off sunshine showers
Off sunshine showers
