Air Supply, Goodnight

How does the time slip by so fast
Why can't it once stand still
For us this night, will always last
With every breath until
And if you find you're all alone
Remember you have wings

As long as there is air to breathe
And music left unsung
You know that in the darkest night
A dawn has just begun
So think of us, we'll think of you
Together we'll take flight
For we shall never say goodbye
We only say goodnight
For we shall never say goodbye
We only say goodnight
