702, I Still Love You

[Verse 1:]
See everybody needs someone by their side
And I canand#8217;t go on without you another night
Sine been hanging shitand#8217;s been done
My life has been so slow without you, you
See it donand#8217;t take a rocket scientist to know I
love you
And it donand#8217;t take a rocket scientist to know I
need you
See if you believe that you and me
Can change the world some day
Then you believe me when I say
[Chorus:]
I still love you
I still love you
I decided I still love you
I still love you
I decided
[Verse 2:]
So what do you think
Lets get back together, lets get back together
Itand#8217;s nothing it could hurt, it could only get
better
Think of what it lacks feel like
You and I didnand#8217;t turn out nice into forever
See, see it donand#8217;t take a rocket scientist to know
I love you
And it donand#8217;t take a rocket scientist to know I
need you
See if you believe that you and me
Can change the world some day
Then you believe me when I say
[Chorus:]
I still love you
I still love you
I decided I still love you
I still love you
I still love you
I still love you
I decided I still love you
I still love you
I decided
[Verse 3:]
Never to not be so happy and sure of myself
Baby life without you is so dull, so dull, so dull
Now I know it will never be me loving someone else
This precious love you much I need this star
I remember when we first fell in love
I was too young to know what it was
I couldnand#8217;t address what made melt
But quick to tell you how it felt
That love is so real and it still is
[Chorus:]
I still love you
I still love you
I decided I still love you
I still love you
I still love you
I still love you
I decided I still love you
I still love you
[Bridge:]
Just look at the things, look when you do me and
you

Life changing the face of those and that we once
knew
So when itand#8217;s the sun the shine the oceans are blue
And that we can laugh and cry and that through
