

112, Whatcha Gonna Do

(feat. MJG)

You tell me you're keepin' it real with me
You tell me that I'm the only one
You say you'll never leave me lonely, girl
That was a lie

I never wanna see your face again
I don't even wanna be your friend
Don't wanna be used by you again
So I'm saying goodbye

[1] - Girl, I know that you're thinkin'
I'm just playing with your head
And I know you been tossing
And turning in your bed
Trying to figure out the reason
Why I left you all alone
Was it worth you giving up
The greatest love you've ever known

Listen baby

[2] - Baby, whatcha gonna do without me
Whatcha gonna do without my love
Whatcha gonna do when my love is gone away from you
Whatcha gonna do without me
And everything I used to do for you
Whatcha gonna do when my love is gone away from you

Alright
I never shoulda put my trust in you
But I never thought you'd let me down
It seems like you get a thrill out of
Out of making me cry
And baby everybody's seen it but me
Cuz I was so blind I couldn't see
I never really needed your help
I could do for myself

[Repeat 1]

[Repeat 2]

Baby, can't you see
I want it for you more
Than you want it for yourself
Always there for you
I was there for you, there for you
What ever you needed
You know what I've gone through for you

[MJG]

I was saying bye-bye baby
Now whatcha gonna do
My love is gone, the money gone and the house too
Now how bout you?
Get away from me and let me clear my mind
This is hurtin' me just to visit you one more time
I know you fine but I ain't gonna get distracted by your charm
I figure this is the beginning, you intended some harm
Remain calm, it ain't no reason to drop the ball
you should get 10 points just for being On My Arm
But still, that's the past tense, I was speakin' a then
You asking me 'bout that woman now, it's a negative ten"

I had to catch myself before I tried to make her my girl
Start a family and start to bring kids in this world
See life is like a gun, it can backfire then shoot you.
What's good for the present ain't always good for the future
I shake and shiver, look deeply in the mirror at myself
Wondering will I make it with someone else
Whatcha gonna do...

[Repeat 2 until fade]
