Andrzej Zaucha, Variations on the eye rhyme

Up and down all along the line
The only thing I crave's a flicker of starlight in your eyes,
No use trying to change my mind, you see -
That's what I would like to live by.
All my life I've been looking up
To find a little star to twinkle at me to make things shine.
But the stars they give off cool light, you know.
Unlike the one in your eyes -
It's no use denying.
Why keep on scanning the sky for a star
When I have found the only one that I will keep and cherish,
Why keep on looking up to scan the sky
When I found my love.
I would rather look in your eyes
To find a little star to twinkle at me to make things shine
When I got you now by my side.
Up and down all along the line
The only thing I crave's a flicker of starlight in your eyes.
No use trying to change my mind, you see.
(Scat) Other guys have been looking up
To find a little girl with a kaleidoscope in her eyes,
But they want quite a different high, you know,
Unlike the one in your eyes -
It's no use denying.
Why keep on scanning the sky for a star
When I have found the only one that I will keep and cherish.
Why keep on looking up to scan the sky
When I found my love.
I would rather look in your eyes
To find a little star to twinkle at me to make things shine
When I got you now by my side.
Up and down all along the line
The only thing I crave's a flicker of starlight in your eyes,
No use trying to change my mind, you see -
That's what I would like to live by.
All my life i've been lookin up
To find a little star to twinkle at me to make things shine.
But the stars they give off cool light, you know.
Unlike the one in your eyes -
It's no use denying.
Why keep on scanning the sky for a star
When I have found the only one that I will keep and cherisch.
Why keep on looking up to scan the sky
When I found my love.
I would rather look in your eyes
To find a little star to twinkle at me to make things shine
When I got you now by my side
When I got you now by my side
Oh baby, look that's just right - Yeah!
