Entropy
Blowin Smoke
(w graber)
Pulled all the answers from the air
Believed in beliefs but didn't care
Visionaries lost without a clue
And all the lost will look for what to do

He's just blowin' smoke but still you're here
He's just blowin' smoke but still you're here

Taught and told so felt that this is true
So thought and fought to figure it all out
And see they made it up to end their fear
And never think about it 'till it's near

He's just blowin' smoke but still i'm here
He's just blowin' smoke but still i'm here

And those who see just seem more blind
Nicer to know than undefined
The more i think the more it seems unclear
Many thousands gone but still i'm here
