Bernard Crystal, You're Gonna Miss A Whole Lot

(Dennis Morgan/Stephen Allen Davis)
Who started this, I don't know
You're already packed and ready to go
I hope she's worth it after all that we've been through
You're breakin' my heart, but I have to be strong
So go right ahead, I'll get along
Just one thing you better know is true
You're gonna miss a whole lotta love
You're gonna wish you had me back
Late at night when you're starin' at the stars above
You're gonna miss a whole lotta love
Will she hold you close like I used to do
And think that look in your eyes is true
Does she believe those words you used to say to me
Do you even know how it makes me feel
To watch you throw away the dreams we built
Well, I hope she's everything you'll ever need
'Cause you're gonna miss a whole lotta love
You're gonna wish you had me back
Late at night when you're starin' at the stars above
You're gonna miss a whole lotta love
You're gonna miss a whole lotta love
There's no use wastin' words anymore
I know it's over, what are you waitin' for, just remember
You're gonna miss a whole lotta love
You're gonna wish you had me back
When you're lying there starin' at the stars above
You're gonna miss a whole lotta love
