Placebo, Allergic (To Thoughts Of Mother Earth)

Any means in your horizon
Heaven in a tourniquet
The after life to keep your eyes on
Bitter pill you take you take today
With expert levitation forward
Polished to the nth degree
It takes it's smile from every children
You take the beating

Any means in your horizon
Everything walks two by two
We gamble to be born again
You know I never wanted to
With expert levitation forward
Polished to the nth degree
It takes it's smile from every children
You take the beating

The light divining
The light defining
The light divining
The light divining

Don't let me down
Let me-he
Let me down
Let me-he
Don't let me down
Let me-he
Let me down
Let me. x2

The light defining
The light divining
The light divining
