Matthew West, I Can't Hear You

This world is making me dizzy
I can't seem to keep it from spinning
This life is screaming so loud now
I can't escape from this crowd now
It's like I'm climbing up on the shoulders
In a room full of strangers
And then everybody walks away

Chorus:
Fly high, jump and touch the sky
High, bring me back to life
I know you're there when I can't hear you
Down now at the speed of sound now
When I touch the ground now
You'll be there when I can't hear you
When I can't hear you

I am a classic case of dysfunction
I talk and talk and still I say nothing
So tell me, am I the voice of my generation?
Is everybody having the same conversation?
We're all climbing up on the shoulders
In a room full of strangers
When we should be reaching for you

Chorus:
Fly high, jump and touch the sky
High, bring me back to life
I know you're there when I can't hear you
Down now at the speed of sound now
When I touch the ground now
You'll be there when I can't hear you
And I can't hear you

Bridge:
Do you ever get the feeling that you're not alone
No matter who you are, no matter where you go?
Do you ever get the feeling that you're not alone
No matter who you are, no matter where you go?
Do you ever get the feeling that you're not alone
No matter who you are, no matter where you go?
Do you ever?
Do you ever?

Feel like you're climbing up on the shoulders
In a room full of strangers
We're all reaching

Chorus:
Fly high
Sky High
Life I
I can't hear you
Down now at the speed of sound now
When I touch the ground now
Know you're there when I can't hear you
Fly high
Jump to touch the sky high
Bring me back to life
I know you're there when I can't hear you
Down now at the speed of sound now
When I touch the ground now
You'll be there when I can't hear you
When I can't hear you

I can't hear you
