Scar Symmetry, The Path Of Least Resistance

The path of choice optimal
The labyrinth unsolved
Haunting the complex of these halls
Adrift upon the massive waves
This godforsaken maze
Suddenly returning to the haze

Guiding star shine bright tonight
And light up the path
Time has come to know myself

Least resistant path
The burning signals I'm finding
Least resistant path
Things to be said and done
I burn with the flames
Float with the uncontrolled waters
My soul flies with the breeze

Perplexed in vast complexity
Ghost in the machinery
Seeking the exit constantly
Facing a hopeless endeavour
Being one's own saviour
Lost without a guiding star

Guiding star shine bright tonight
And light up the path
Time has come to know myself

Least resistant path
The burning signals I'm finding
Least resistant path
Things to be said and done
I burn with the flames
Float with the uncontrolled waters
My soul flies with the breeze

With every corner turned my heart sinks
A mirage lights my hope again
That silhouette could be anything
But I'm beyond the realm of reason

(Solo: J. Kjellgren)

Least resistant path
The burning signals I'm finding
Least resistant path
Things to be said and done
I burn with the flames
Float with the uncontrolled waters
My soul flies with the breeze

Guiding star shine bright tonight
And light up the path
Time has come to know myself
The path of least resistance
