Soul Coughing, Circles

When you were languishing in rooms I built to foul you in
And when the wind set down in funnel form and pulled you in

I don't need to walk around in circles
walk around in circles
walk around in circles
walk around in

dont need to walk around in circles
walk around in circles
walk around in circles
walk around in

When the ghostly dust of violence traces everything
And when the gas runs out just wreck it, you insured the thing

I don't need to walk around in circles
walk around in circles
walk around in circles
walk around in

dont need to walk around in circles
walk around in circles
walk around in circles
walk around in

doomp dah doomp dah doomp
doda doiada doi
x4

But I can't sigh now that you made the move
It has gone and gone to dogs, lay down on the floor

For the right price I can get everything
Slip into the car, go driving to the farthest star

I don't need to walk around in circles
walk a..in circles
walk around in circles
walk around in

dont need to walk around in circles
walk around in circles
walk around in circles
walk around in

dont need to walk around in circles
walk around in circles
walk around in circles
walk around in...
