

# 3-11 Porter, Where love's never been

First day of a brand new week  
On a new scene where loves never been  
A new church on every corner  
A new religion; tomorrow its over  
Ugly faces, no entertainment  
The sea is white; the streets are yellow  
A passing stranger whispered to me  
If you go inside youll find a tree  
Where love's never been  
Untold on the screen  
Where love's never been  
Where love's never been  
Untold on the screen  
Where loves never been before  
Did I really come this far  
Just to discover how unlucky you are  
Did I really travel this distance  
Just to discover the dark that you keep  
A bad day, a bad religion  
A strange habit, a holy war  
The great love game has never been played  
You switched to the scene that is red  
Where love's never been  
Untold on the screen  
Where love's never been  
Where love's never been  
Untold on the screen  
Where loves never been before
