Firewind, Perished In Flames

What brings this anger
To kill us and lie
Now we have hunger
Our children will die

And they anchor
Our strength to the ground
And will this banker
Steal without sound

They fought a battle
To erase our race
They promised death
In a fiery place

In the middle of the night
The siren's calling
In the middle of the night
Perished in flames

Now we'ree in danger
We can't survive
Locked in with strangers
They're gonna burn us alive

They fought a battle
To erase our race
They promised death
In a fiery place

In the middle of the night
The siren's calling
In the middle of the night
Perished in flames

In the middle of the night
The masses who's praying
In the middle of the night
The ashes in air

Can't understand the hatred
That's been unleashed on us
Our daily bread
Been canceled by the press
A crown of stolen diamonds
Won't last forever
Our spirit never dies
And you'll pay the price

They fought a battle
To erase our race
They promised death
In a fiery place

In the middle of the night
The siren's calling
In the middle of the night
Perished in flames

-Solo-

In the middle of the night
They're gonna burn us alive
In the middle of the night

Whoa
