Freddie Wadling, International

Hear my dream, nothing still happens to me
I can't see whatever comes out will be
Hear my dream, nothing still happens to me
I can't see whatever comes out will be

International, my mind is forever free
It's international to me
International, my mind is forever free
It's international to me

So they say, everything's coming my way
There's no delay, tomorrow is some other day
All these things, never know just what they brings
All ablaze, I'm just a being of graze

International, my mind is forever free
It's international to me
International, my mind is forever free
It's international to me
