Gabin feat. Mia Cooper, Lost And Found

There in a bot on a shell in it a region no fray
Her ass so big glue and bright sweet in the sun
He says a lot to himself 'why did i talk sweet always'
With all those other things i play to forget
Show me a picture can last but half time
Made those flash
From the day there in the sun
Until you're sayin' goodbye.
The all jets in
Those lost and found
Those things that fell from heart gets to the ground
The first of end
The pratical
Waiting till the world to play him come back to land

She says take him you think
I was the last one to know
I could see one was to come
Lonely for you

I still remember that day with so much left to say
And just watch ing the times grow
It was'nt so long ago.
The all jets in
Those lost and found
Those things that fell from heart into the ground
The first of all
The pratical
Waiting till the world to play him come back to land
Remember on that in tiv each we say good bye we'll see

The all jets in
Those lost and found
Those things that fell from heart into the ground
The first of all
The pratical
Waiting till the world to play him come back to land
Just lost and foundcome back to land just lost and found
