

# 311, Six

You know patience pushing a dream brings my demons to life  
Songs are vacations our soul salvation will you  
Suspend your disbelief I'd like to be the, thief  
That steals that jaded necklace that you're always wearing  
I'd take that thing and with my knife I'd start pairing so  
Chop chop piece piece and send it to the raiders of LA  
There are so many this land of plenty  
The things we lack straight square within our grasp

Ever you do ever you think  
Whether you're brown or you're pink  
I think not thinkings better bout it  
When you stop to think  
The jaded ones will wither  
While the optimistic grow

I settle that a bet will let a large amount  
So indulge me just for a minute imagine no one holdin out  
All trying for peace my brothers down  
Some others down it happens slow  
think you should know the direction that the world go peace

They number six to make them feel like men  
They one up us cuz we're much to much for them  
OK the method to the mischeifs over there then  
Sike shazam we strike with the lightnin  
Through space we move and emit an ill tracer  
We're set to light your world kid we're your maker  
Check it our karma plus the avant garder  
Style of out sect wise to ways comes to wreck  
While the masses mill around curse in anguish  
311 stompin' em down with the quickness  
We see all the crews that be comin' around now  
Takin' they notes to get our sweet ass style down

Fending off the foes that try to shut us down  
Like the warrior souls we are we never give in  
So what we call is dope we know will come around  
Chill in Southern Cali Y'all that's how we livin'

We spend our lives learning  
If you like learning life is large  
It could never be only the ups  
The downs will always come around yeah yeah  
Like a drive through Estes Park you savor the sun  
But when the clouds come make animals
