Twilight Force, Night of Winterlight

Eternal night, age of the dying light
Lights in the sky have been fading,
Winter winds of ice are coming
Prophesies told of a mage of the winter snow
Wizard of Blizzard, master of ice,
Wielding magical might

Long long ago, centuries past
He returns with fire and ice

Storming through the skies
The stars falling on the night of winterlight
Soaring high above white fields,
Frozen on the Night of Winterlight
Ride through the ice,
And a new dawn will arise,
Beyond the Night of Winterlight

Daylight arose again warming the wintry land
Wizard of Blizzard returns again,
After thousands of years
Healer of stars, unmake the night,
Night of Winterlight

Storming through the skies
The stars falling on the night of winterlight
Soaring high above white fields,
Frozen on the Night of Winterlight
Ride through the ice,
And a new dawn will arise,
Beyond the Night of Winterlight
