# Katerine, Live Wire

I'm gonna find myself a call box
I'm gonna spin myself around
I'm a super power manga
Gonna come out feeling stronger
I'll kick it all over town
I'm gonna get myself a mission
Cause the people wanna get on down
Stick your finger in the socket
And I'll turbo charge your rocket
Gonna spread myself around
Full color intensify your dreams
Turn up the power
Feed from my electricity
I wanna shoot you with my laser
I'll get you sparked up from the ground
I'm gonna turn into bionic
Cause I know that you are on it
Yeah the supersonic sound
We don't need resuscitating
Pulse is getting high
Get the doctor operating
It feels intoxicating
You'll be shocked by my live wire
Full color intensify your dreams
Turn up the power
Feed from my electricity
Charge it up, burn it up, spark it up now
Full color intensify your dreams
Crank up the power
Feed from my electricity
Waking up to your own senses
Cause you know you wanna tear away
Just look what we've created
So your life was overrated
Push the button if you wanna play
