# Lemar, Body Talk

Tonight you gotta trust me girl
It's all about actions
Not about words
Got plans for you
What you want me to
Girl I will do
You can pick and choose
You know that I'll lay it on
On the back of my bike
You'll be holding on
In the day
Take pictures in the sun
In the night
Let the city lights turn us on

We can take it back to the crib
You can show me what
You're working with
Open up and let me in
Let your body do the talking
Now that we're finally all alone
I'm gonna give you something worth waiting for
So lets just hurry and get it on
Let your body do the talking

[Chorus:]
Let your body do the talking
Let your body talk
You can let your body talk
(So Come on!)
Let your body do the talking
(Get down through the night)
Let your body talk
(It's alright)
Just let your body talk
(So Come on!)

Wake up; it's a brand new day
And i've got plans to
Make you happy
Lace you with diamonds
A girl's best friend
Just watch me closely
I'll break you in
Come on, let's hit the club
No time for talking
Just rave non-stop
As the tempo slows
Its time to leave

As you look in my eye
You know what I need

We can take it back to the crib
I can show you what I'm flexin with
Open up and let me in
Let your body do the talking
Now that we're finally all alone
I can give you that something you've been waiting for
So lets just hurry and get it on
Let your body do the talking

[Chorus x2]

So many things I'd like to do
So many ways to make
Your body move
Now you're home with me
We can have a private party
Come get down with me
So come on!

(Get down through the night)
(It's alright)
(So come on!)

[Chorus x2]
