Marshmello, Here With Me (Feat. CHVRCHES)

can i tell you something
just between you and me
when I hear your voice
I am I feel finally free
every single word is perfect
as it can be
and I need you here with me

when you let me up
I know I'll never fall
I can speak to you
by saying nothing at all

every single time
I found if harder to breathe
cause I need you here with me

every day
you're saying the word
and I want you to say
there's a pain in my heart
and I won't go away
now I know i am falling in deep
cause I need you here with me
every day
you're saying the word
and I want you to say
there's a pain in my heart
and I won't go away
now I know i am falling in deep
cause I need you here with me

I think o see your face in every place
that I go
I try to hide it
but I know that it;s gonna show
every single night I find harder to sleep
cause I need you here with me

every day
you're saying the word
and I want you to say
there's a pain in my heart
and I won't go away
now I know i am falling in deep
cause I need you here with me
every day
you're saying the word
and I want you to say
there's a pain in my heart
and I won't go away
now I know i am falling in deep
cause I need you here with me

can i tell you something
just between you and me
when I hear your voice
I am I feel finally free
every single word is perfect
as it can be
and I need you here with me
