Men Without Hats, Utter Space

I come from outer space at least I think I do
I need a change of pace that's why I walk with you
It's a change up-left-one-two
In outer space
I've had a change of heart I'm tired of being the best
I need another part to make an educated guess
and help me pass the test
In outer space
In outer space
In outer space
I come from outer space at least I think I do
I need another face I need one just like you
It's a change up-left-one-two
In outer space
In outer space
In outer space
The space
outer space
The space
In outer space
