Nelson, Let's Talk About Me

I hear you loud and clear my dear but it's nothing I haven't heard
Excuse me if I'm not hanging on your every word
I can recite each line by heart
I know my role...i know my part
But the truth of the matter is I'm through with all this chatter

Enough about you baby-let's talk about me
You don't even have a clue lately what I really need
You forgot how to listen
That's what I'm missin'
And I just wanna scream enough about you baby
Let's talk about me

I must've dropped a hundred hints and you let 'em fly right by
Time and again I find myself just wonderin' why
Now when I try to talk to you
You're not the girl I thought I knew
Well, here's some good advice let me get a word in edgewise

Enough about you baby-let's talk about me
You don't even have a clue lately what I really need
You forgot how to listen
That's what I'm missin'
And I just wanna scream enough about you baby
Let's talk about me

Take some time to see what's on my mind
You'll be amazed at what you'll find

Enough about you baby-let's talk about me
You don't even have a clue lately what I really need
You forgot how to listen
That's what I'm missin'
And I just wanna scream enough about you baby
Let's talk about me
Let's talk about me
Me, me, me, me, me-yeah
Enough about you baby
