Nelson, With This Kiss

With this kiss oh can't you feel it
Every promise we made we just sealed it
As these hearts beat wild on a night like this
With that moon smiling down on us
Well, I figure we can't miss
With these hearts, with that moon, with this kiss

It almost takes my breath away
When we're standing this close
There's so much that I wanna say, but I think you know

I look in your angel eyes
And I wanna take my time

With this kiss, oh can't you feel it
Every promise we made we just sealed it
As these hearts beat wild on a night like this

With that moon smiling down on us
Well, I figure we can't miss
With these hearts, with that moon, with this kiss

I was dreaming about
Love I can't live without
You were wishing on a star
Now it's perfectly clear
While we're both here
This is where forever starts

With this kiss, oh can't you feel it
Every promise we made we just sealed it
As these hearts beat wild on a night like this
With that moon smiling down on us
Well, I figure we can't miss
