Olivia Newton-John, Act Of Faith

Sure as we know there will be dawn
That we'll see the morning sun
We should trust that thru the night
Our love will still shine on
Sometimes we get too comfortable
With things the way they are
What we both would ask of love
Might seem a bit too far

So far away - from hope and trust
Will love still be there for us
I pray - that forever
We will face all our fears and believe
That love will be there for us
So we pray - 'cos love is an act of faith

Once you said you would never leave
As you held me in the dark
I knew you by your love for me
And I soothed your longing heart
But now we're lying here miles apart
But close enough to touch
A sea of silence - much too wide
We stand and lose so much

Drifting away - from hope and truth
Will love still be there for us
We pray - that forever
We will face all our fears and believe
That love will be there for us
So we pray - 'cos love is an act of faith

You have my everything
So please don't take it away
The hope and trust
That love will be there for us
I pray - that forever
We will face all our fears and believe
That love will be there for us
We pray - that forever
We will face all our fears and believe
That love will be there for us
So we pray - 'cos love is an act of faith
