Red Lights Flash, Songs And Dreams

Search for your way and find it now
No mistake to make this step
My heart is only yours
Can anything destroy this love?
It's a part of a scene
Of some friends that seem to care
Listen to your love and you will stay
Now we got to move on
While others stand still and stare
I had a dream, but is it just a dream?
It's the right direction when your heart is true
I'm sure that this is reached
When you just think what you want to think
Don't stick to the past-chains
The whole life through just think
What you wanna do

How many times you had to ask
If your facade looks cleaned up
Just hide your emotions away
So give up this boring game
Dispassionate and without mind
It seems to make us numb
Slide through the keyhole of your cell
Target specified - smash the force that keeps you trapped
Don't make the same mistake again
Now we got to move on
While others stand still and stare
I had a dream, but is it just a dream?
It's the right direction when your heart is true
Don't categorize, just analyze
Do not believe these lies
Don't stick to the past-chains
We rely on you!
