Sham 69, Sloanberg

No this world's not getting smaller
They just made concrete fat and taller
But you don't care, when you stare
At how many people are living up there

Slangbang, hey man
Don't tell me that it's out of date
Slangbang, hey man let's communicate

Our new computer's so entertaining
But step outside, and it'll do your brain in
Now you've bought it can you ignore it?
I bet you fell in love the day you saw it

Slangbang, hey man
Don't tell me that it's out of date
Slangbang, hey man let's communicate

Alien intelligence and animal instinct
I didn't say a word I didn't make you think it
Alien intelligence and animal instinct
I didn't say a word I didn't make you think it

No this world's not getting smaller
They just made concrete fat and taller
But you don't care, when you stare
At how many people are living up there

Slangbang, hey man
Don't tell me that it's out of date
Slangbang, hey man let's communicate

Alien intelligence and animal instinct
I didn't say a word I didn't make you think it
Alien intelligence and animal instinct
I didn't say a word I didn't make you think it
