The 69 Eyes, Too Much To Lose

nothing's ever easy
nothing's ever plain
you gotta take what you can get
My fist, for real
No more of sympathy
No more humanity
Streets give and streets take
Cold comes,
Everyday too late

I know we'll meet again
Streetwalking kids,
and the world said

I've got too much to lose,
to lose with you
I've got too much to lose,
to lose with you...

technology and satellite til
no one here gets out alive
the new star comes out in the sky
Crazy diamonds,
they never ever die

I know we'll meet again
Streetwalking kids,
and the world said

I've got too much to lose,
to lose with you
I've got too much to lose,
to lose with you...

guitar solo

I've got too much to lose,
to lose with you
I've got too much to lose,
to lose with you...
