

# Above And Beyond, Far From In Love

I can see behind your eyes that you're afraid of who you are  
Only silence now between us  
I'm amazed we've come this far  
Far from in love  
Far from in love  
Like a fire burns to embers  
I know this is where it ends  
In the ashes we are dying  
Almost strangers only friends  
Far from in love  
Far from in love  
Far from in love  
Far from in love  
Far from in love (So far from love)  
Far from in love (You know I don't know how we'd get so far)  
Far from in love (Far away from the love we had, yeah, yeah)  
Far from in love (From all the loving that I knew)  
(How I miss your touch)  
Far from in love  
Sailing away from me like melting snow in my hair  
I miss your touch  
Far from in love  
Trying to sew up a love that was built on the sun  
I miss you so much
