

Action Reaction, Spark The Sun

We all live in international fear
We've been dying since the day we were here
And I'll be waiting so long
We all live in international fear
We've been dying since the day we were here
And I'll be waiting so long
I must confess, I will go out again
I'll pass my memories up, igniting flames
To call the ghost and share a glass with you
A motion picture winter
And I'll sleep where the clouds meet the ocean
For the dreams on my back are at peace
And my head sparks the sun
And my heart sings home to you
Appalling for a crock and no repair
Oh doctor, hook me up right, hook me up right
This newly opened door a toast to you
And I can't feel the dark, I can't feel the dark
And I'll sleep where the clouds meet the ocean
For the dreams on my back are at peace
And my head sparks the sun
And my heart sings home to you
Raindrops, time stops
I open my eyes to the room
And I feel alive and I feel alive
And I feel alive, alive
And I'll sleep where the clouds meet the ocean
For the dreams on my back are at peace
And my head sparks the sun
And my heart sings home to you
