

# Adam Salked, Waiting for you

Say something  
how well you are  
and make me smile  
take this moment  
as where it starts  
and lead me home  
coz i'm needing you  
here with me

ref:

i've been waiting for you  
looking from a far  
now we're in position as waste sometime  
there's not a soul around us  
let me look into your eyes all night  
reach for me when we're apart  
i'll make it right  
every moment you'r in my heart  
i'll take you warm  
coz i'm needing you  
here with me

ref:

i've been waiting for you  
looking from a far  
now we're in position as waste sometime  
there's not a soul around us  
let me look into your eyes all night  
there's your touch (times we're right)  
everytime (i walk away)  
there's your touch (times we're right)  
so let's take this things to far  
run away tonight...  
so let's take this things to far
