Adema, The Way You Like It

I'll get inside you I'll get inside you

Don't live with shame 'Cause feelings change One thing remains The reason why you're gonna wanna take me home tonight It's all the same Up in this game The people change But money claims Everyone from everything I can't believe that you would think that shit of me I was amazed at the torment that you put me through If you could see Right through the greed And all your needs You'd realize that you were just about as bad as me

Sometimes I only remember The days when I was young Nowadays no one remembers when they were young and stupid The way you like it Come on baby Help me, someone to confide in I'll get inside you Now you're begging me to stay

My life has changed But fuck the fame I'll stay the same You can't complain when you can pay the bills and do your thing Appreciate Don't playa hate Congratulate I miss the pain and the torment that you put me through So what's to fear when everything is crystal clear You realize that you should do the things you wanna do Don't give into What people say Don't be ashamed To separate the feelings on your mind you can't sedate

Sometimes I only remember The days when I was young Nowadays no one remembers when they were young and stupid The way you like it Come on baby Help me, someone to confide in I'll get inside you Now you're begging me to stay I'll get inside you

Now you're begging me to stay I'll get inside you

You would always say I'd never be shit They would always say I'd never be shit But look at me now, look at me now!

I'll get inside you Now you're begging me to stay I'll get inside you Now you're begging me to stay The way you like it!

Sometimes I only remember The days when I was young Nowadays no one remembers when they were young and stupid The way you like it Come on baby Help me, someone to confide in I'll get inside you Now you're begging me to stay

I'll get inside you

Sometimes I only remember The days when I was young Nowadays no one remembers when they were young and stupid The way you like it Come on baby Help me, someone to confide in I'll get inside you Now you're begging me to stay

I'll get inside you Now you're begging me to stay I'll get inside you Now you're begging me to stay

The way you like it
