

AFI, End Transmission

Pull the top down, use your knees to drive
I'll make it worth your wild, just let me taste the sky
You pressed your mouth on mine and got me a star
And said "we never, can truly, know who we are"
Know who we are...

With the lights out and the night inside
The broken radio was playing suicide
I felt myself falling, I confessed to you
I saw a body, you said you'd see us through
This night has only just begun
If there's discretion that you might abandon
Now's the time
We'll finally pass the morning sun
Go grab your bag, I'll bring the gun
The gun...

Keep the top down, use your knees to drive
I'll hide these words, there only yours to find
You pressed your mouth on mine and said they'd call the stars
They said we never, can truly, know who we are
This night has only just begun
If there's discretion that you might abandon
Now's the time

We'll finally pass the morning sun
Go grab your bag, I'll bring the gun
Everything was burning bright
Everyone was frightened

You said, "Stay Strong";
Everybody knowing that what we invited
Still remains when we're gone
This night has only just begun
If there's discretion that you might abandon
Now's the time

We'll finally pass the morning sun
Go grab your bag, I'll bring the gun
Ohhh...

This night has only just begun
If there's discretion that you might abandon
Now's the time

We'll finally pass the morning sun
Go grab your bag, I'll bring the gun
The gun..

I'll bring the gun... oh...
