

Afro Celt Sound System, When I Still Need You

Don't forget me
Even though you're gone
They took you away when you were still young
We needed to get to know each other
They took you away when you were still young
We still needed to get to know each other
They took you away when you were still young
When I still needed you. Don't forget me
Even though you're gone
Gone, gone, gone We grew up together
We loved each other
There, where we lived
In Gikondo
We shared everything
Even our secrets
Because we were friends
Soulmates
And now they've taken you away
When it was still too early So now my friend
Let me ask you this So now my friend
Don't forget me
Don't forget me
Even though you're gone So my friend
When you see me
Will you remember me?
