

# Agnostic Front, Crucial Moment

So many people will come and go  
Past their time before they know  
Swear they were there from the start  
Never had it in their hearts

Things you do--come back to you  
Things you've said--echo on inside your head  
Figureheads come cheap these days  
No one listens to what they say  
In their faces I see the fear  
A crucial moment drawing near

You pay the price--take bad advice  
What they said--echoes on in your head
