

# Air, Biological

Thousands of hairs  
Two eyes only  
Its you

Some skin  
Billions of genes  
Again its you

XX XY  
That's why it's you and me

Your blood is red  
It's beautiful genetic love

Biological  
I don't know why I feel that way with you  
Biological  
I need your DNA

Your fingerprints  
The flesh, her arm, your bones  
I'd like to know  
Why all these things move me

Let's use ourselves to be as one tonight  
Apart of me would like to travel in your veins

Biological  
I don't know why I feel that way with you  
Biological  
I need your DNA
