

Alien Ant Farm, Death Day

I slowly shoot these words like weapons
And go insane
I watch you drive your stupid car
You go away
You never were one to use caution
And you're gonna pay
You know I love to see it happen
I always tried to keep you near me
Without the pain
I love to tie us into knots
We slipped away
I tried to captivate you, on that evening
He was leaving, with the girl I love to kill
Happy Death day to you baby
I know you're flying in the blue now
We'll be together real soon now baby, don't you worry
Papa got a brand new body bag for you
Cable cars run through my mind
Reminiscent Bay
I think of north on Valentine
I wish you'd stay
You never were one to use caution
It slipped away
I somehow knew this would happen
Happy Death day to you baby
I know you're flying in the blue now
We'll be together real soon now baby, don't you worry
Papa got a brand new body bag for you
And I got a fresh new kind of attitude
I slowly shoot these words like weapons
And go insane
I watch you drive your stupid car
You go away
You never were, you never were
You know I love to see it happen
Happy Death day to you baby
I know you're flying in the blue now
We'll be together real soon now baby, don't you worry
Papa got a brand new body bag for you
And he ain't ever ever coming back to you
