

Alissa Moreno, Far from here

Fight hard on a night like this
Look for a star and wish
You could get out of it
Bite down and then pray, pray, pray
You'll make it through this to sing and say
You hold life dear
Moments turn to hours which become years...
And now I'm
Far from here, and we are happy
Far from here, we are all right
Far from here, things are peaceful
Far from here, we have insight
Far from here, we've detangles
Our strangled hold
And I hope to see you there
Rise high out of this whole scene
Look down and separate yourself
From your worst dream
Then fly far and then stay, stay, stay
Out of the way until the coast
Is clear and safe
Moments turn to hours that become years...
And now I'm
Far from here, and we are happy
Far from here, we are all right
Far from here, things are peaceful
Far from here, we have insight
Far from here, we've detangled
Our strangled hold
And I hope to see you there
Oh, it's hard to imagine
The things that we survive
Will we understand it all
One day when we arrive?
Far from here, and we are happy
Far from here, we are all right
Far from here, things are peaceful
Far from here, we have insight
Far from here, we are laughing
Far from here, we are thankful
Far from here, we're forgiven
And for that we are grateful
Far from here, we've detangled
Our strangled hold
And I hope to see you there
