

Alkaline Trio, Good bye forever

ALKALINE TRIO

Miscellaneous

Good bye forever

Take your wings outside, you can't fly in here

Besides, a purple sky is better soaring

for you my angel

You're an angel, you little devil

As for me i'll stay inside, I'll be just fine

and I'll watch from the window

Cannot categorize the nature of this sickness

A miracle that you're alive

Stuck to the roof of my mouth with a staple

Remember last April when we saw US Maple?

Somehow the singer showed the Fireside

exactly how I feel

And we say goodbye and go underground

Or up towards the sky

Up in smoke burnt down to size

At least we're still friends, at least we're still alive

Take your wings outside, no use for them in here

Bad luck to open inside, work like umbrellas

Like a broken mirror, it's getting clearer

The end is closer than ever before

And you'll want nothing more

When your head hits the floor

And you're lost in the darkness

And we say goodbye and go underground

Or up towards the sky

Up in smoke burnt down to size

At least we're still friends, at least we're still alive

And we say goodbye and go underground

Or up towards the sky

Up in smoke burnt down to size
