

Alkaline Trio, I Found Away

Stumbling through the dark with a broken heart, all alone at it once again
Seeping in like a feeling you haven't felt since way back when
In the dead of that night, like the summer of Sam
I caught word of the commotion you caused via telegram
And got all worked up, we got all worked up
I found away
Over the fear and through the flames, I'm diving in
Don't follow me, stay right here I'll be back for you someday
I found away, it'd be best if you just stayed
It's not safe, don't follow me
I found away, I found away
Frozen in the lights of a locomotive, tied to the tracks again
You said you haven't felt this comatose since you can't remember when
You fly off the handle every time we sleep, straight off the deep
From the top of my lungs the truth shall be sung, sharp and damning
Violently stabbing at secrecy
That look on your face, it's more than I can take it's scaring
The living hell straight out of me
