

# Alkaline Trio, I Lied My Face Off

Well it's not fair  
It's not even close  
You tied me down  
Where I'm forced to watch as you poke holes  
In every part of me  
Containing something secretly  
Something sacred to me

Well I lied my face off  
When I said that I would be okay  
It's never fine when you go away  
These cuts run deep these scars are permanent  
And always on display  
This makes things difficult for me

Well It's not fair  
It's not even close  
You fed me the sun  
Burned me up inside and watched me choke  
On everything we did  
On everything we lived  
Let's see if I can live again

Well I lied my face off  
When I said that I would be okay  
It's never fine when you go away  
These cuts run deep these scars are permanent  
And always on display  
This makes things difficult for me

And like an empty sterile room somehow I made a mess  
Like watching newborn babies crack from work related stress  
And like an empty sterile room somehow I made a mess  
Like watching newborn babies crack from work related stress  
I'm bad luck  
Can't fuck  
Got no reflection today  
Maybe I'll stay down next time I get hit by a train  
By a train

Well I lied my face off  
When I said that I would be okay  
It's never fine when you go away
