

# Alkaline Trio, We Can Never Break Up

We can never break up  
We can never not show  
We can never go home  
No, we can never elope

We've only got one choice  
So let's keep making it  
And making it  
Making it  
And making it

A lot of things can change  
A lot of tears will dry  
There's no way out of your head  
I can't still drink like I'm trying

I never had to work too hard  
Let's keep working it  
And working it  
Working it  
And working it

You're like a test, I can't fuck up  
You're like a song in my head, like a la la la la la like a dream  
Don't wake me up and if I never see the light again  
Well I guess they put me in the ground with this smile on my head, my love  
My love

We can never break up  
We can never not show  
We can never go home  
And we can never elope

We've only got one choice  
So let's keep making it  
And making it  
Making it  
And making it

You're like a test, I can't fuck up  
You're like a song in my head, like a la la la la la like a dream  
Don't wake me up and if I never see the light again  
Well I guess they put me underground with this smile on my head, my love  
My love [9x]
