

# All The Day Holiday, Invisible

It was all invisible to me  
you were the only one, the only one that I could see  
On a cloudy day lights still made its way  
you were shining bright leading me on through the night  
that day the snow was falling  
the people were calling  
calling the cabs to take them to their destination  
everyone had a rare determination  
People to see and places to go  
planes above and trains below  
It was all invisible to me  
you were the only one, the only one that I could see  
On a cloudy day lights still made its way  
you were shining bright leading me on through the night

that day the building they stood tall  
the snow continues to fall surrounded by lights  
that shine oh so bright  
I never thought I feel the way I do  
about you  
The river flows beneath the bridge we stand  
Nothing can separate the hold on our hands  
Oh on our hands  
It was all invisible to me  
you were the only one, the only one that I could see
