

Allister, Remember

Remember the moment you face
Is it all straight ahead or behind you?
Well maybe if you look around
You'll see everything's perfectly clear

Picture it all in your mind

Remember where we are now
Open your eyes
&& take it all in
Remember where we are now
This is where your life begins

You feel like you're lost in the crowd
Watching life go on without you
Well baby it's your turn to shine
Everything's starting right here

Don't leave this moment behind

Remember where we are now
Open your eyes
&& take it all in
Remember where we are now
This is where your life begins

Don't look away
It's the life that you choose now believe it
There'll come a day
When you look up and see how good you are with me
Remember where we are now
Open your eyes
&& take it all in
Remember where we are now
This is where your life begins
