

# Alter Bridge, Slip to the Void

Slip to the void  
To the dark  
To the fall  
Crawl to the life you shouldn't know  
You should never come this way  
To test the hands of fate  
You don't belong here  
Peel back the skin  
Close your eyes  
Hell is born  
To the abyss, but be warned  
You fear what you've become  
My God what have you done?  
You don't belong here  
But it's all in the way  
You touch and you obey  
Denial  
But it's all in the way  
You touch and you obey  
Denial  
Sever the ties  
Trip the wire  
Dig your hole  
Doubt is alive and you know  
You were once led to believe  
You were young and so naive  
And now no longer  
But it's all in the way  
You turned your back today  
Left to face this alone  
Left to die with nothing you can hold  
Left to break in the cold  
In the void that you made  
The moment you let love go  
Try to win back your days  
You let them all escape your heart  
Now that you've come so far  
Why did you have to fall so hard?  
Look at what you've done,  
What have you become?  
Left to face this alone  
Left to die with nothing you can hold  
Left to break in the cold  
In the void that you made  
The moment you let love go  
You let love go  
You let love go  
You let love go
